SUMMARY

Digital Transformation Lead with 9+ years in retail and eCommerce systems, leading implementation, enhancement, and support of business-critical Point of Sale (POS), ERP (SAP B1), and WMS platforms. Led teams of up to 9 consultants and engineers, translated business requirements into technical specifications, and delivered API-based integrations across ERP, POS, WMS, and eCommerce platforms. Hands-on in C# and Python, with AWS infrastructure design experience. Delivered over 300K SGD in savings, up to 90% faster processes, and clear SLAs, documentation, and change management.

CORE SKILLS

- **Business-Critical Systems:** POS (CEGID), ERP (SAP Business One, SAP HANA), WMS (Maersk 3PL), eCommerce (Magento), Marketplace Integration
- **Integration and Development:** API Integrations, Systems Integration, Data Consistency, Python, C# (.NET, DI API), SQL, Crystal Reports, KPI Dashboards, Middleware/Metabase
- **Cloud and Infrastructure:** AWS Infrastructure Design, DevOps Collaboration, Uptime and Log Monitoring
- **Leadership:** IT Applications Management, Team Leadership, Product Ownership (Scrum), Change Management, Roadmap and Budget Planning, Stakeholder Management
- **Delivery and Governance:** Requirement Gathering, Technical Specifications, Technical Documentation, UAT, Data Migration, Vendor Selection and Management, SLA Design, L2/L3 Support
- **Industries:** Retail, eCommerce, Supply Chain, Manufacturing

PROFESSIONAL EXPERIENCE

Enterprise Systems Manager

Lovebonito Pte. Ltd., Singapore (Hybrid) | Sep 2024 - Feb 2026

- Directed strategy and planning for the ERP program, covering scaling, vendor selection, infrastructure, and team initiatives across a retail and eCommerce business.
- Led integration of ERP (SAP) with third-party logistics WMS, eCommerce, and POS systems for retail stores, from user stories and technical design through development, stakeholder management, and change management, saving approximately 200K SGD.
- Led end-to-end ERP implementation for subsidiaries in the US, Philippines, and Indonesia (requirement gathering, data migration, UAT, sign-off, post-go-live support), saving 100K SGD in total.

- Led the Malaysia E-Invoicing (MyInvois) integration from requirement gathering through vendor selection and go-live.
- Optimized master data processes, achieving a 90% improvement in process time, and transactional data processes, reducing transactional volume by up to 75%, improving data consistency across platforms.
- Led AWS infrastructure design to host the ERP system in partnership with the DevOps team.
- Defined technology roadmaps and budgets based on stakeholder requirements and trade-off analysis.
- Designed and implemented internal and external support SLAs and maintained technical documentation and change management processes.
- Led cross-functional bug resolution with SAP, Operations, Finance, Data, and Engineering teams.
- Designed KPI dashboards for Finance and Operations teams.
- Monitored system logs to maintain maximum uptime.

SAP Functional Consultant

Lovebonito Pte. Ltd., Singapore (Remote) | Dec 2022 - Aug 2024

- Gathered requirements for SAP Business One roll-out, new features, and third-party integrations; produced scoping documents, workflow designs, and end-user manuals.
- Partnered with Operations, Accounts, Technology, and Product teams to automate business flows and remove process inefficiencies.
- Managed development, integration, and roll-out projects, including selection of new third-party software, with project plans and resource management.
- Defined the SAP Business One yearly roadmap, split into halves and quarters after trade-off analysis with stakeholders.
- Developed C# .NET applications using DI API to sync data between SAP and third-party apps.
- Developed Crystal Reports, ad-hoc reports, alerts, and approvals.
- Created test plans and test cases, ran UAT with end users, and delivered training and documentation.
- Provided L2 and L3 support and created troubleshooting guides.
- Designed and implemented internal and external SLAs.

Manager, Project Support

Hussain Chaudhury Consulting, Lahore, Pakistan and Dubai, UAE (Remote) | Dec 2020 - Dec 2022

- Led the support team for digital transformation initiatives and managed technical and functional resources for post-go-live support.
- Designed and implemented service level agreements (SLAs).
- Led system customization efforts and served as the interface between key stakeholders.
- Identified and managed project risks, change requests, and key decisions.
- Ensured compliance with client policies and procedures and managed budgets and milestones.
- Worked with clients to analyze and design system specifications for processes within company-wide ERP systems.

Technical Supervisor

Hussain Chaudhury Consulting, Lahore, Pakistan | May 2019 - Nov 2020

- Led a technical team of 9 consultants delivering SAP Business One for digital transformation projects.
- Produced As-Is and To-Be documentation from client legacy requirements.
- Customized SAP Business One during implementation and post-go-live support.
- Coordinated with the SAP HANA infrastructure team on hardware and development environments.
- Delivered end-user training and enablement.

Senior Technical Consultant

Hussain Chaudhury Consulting, Lahore, Pakistan | May 2017 - Apr 2019

- Managed a team of 3 consultants.
- Customized SAP Business One and developed add-ons, reports, alerts, approvals, and stored procedures.
- Built SAP Business One Fiori dashboards and KPIs for business intelligence.

Technical Consultant

Hussain Chaudhury Consulting, Lahore, Pakistan | Oct 2016 - Apr 2017

- Customized SAP Business One; developed Crystal Reports, alerts, approvals, data validations, stored procedures, and formatted search (FMS) queries.
- Built Fiori dashboards and KPIs; worked with SAP SQL and HANA.
